

ELENA WINTERS

Fairview Heights, IL 62208 || elenacoleman2120@gmail.com || (314) 560-3466

SUMMARY

An adaptable and innovative problem solver experienced in the design, development, testing, and maintenance of software applications. Develop automation processes to resolve issues at all levels, driving customer engagement. Communicate with stakeholders; successful organizational skills to meet deadlines and deliverables. Able to shift priorities; solve technical problems creatively; work with cross-functional teams. Implement, test, and deploy business requests for Guidewire InsuranceNow product and custom projects for transferring insurance bookrolls and check transfers.

EXPERIENCE

MADISON MUTUAL INSURANCE COMPANY, EDWARDSVILLE, IL

IT DEVELOPER, 2025-CURRENT

Contributes to new feature development, bug fixes, and system enhancements within the InsuranceNow platform. Additionally, developed and maintains IVANS Book Rolls and HC3 transfers. Responsibilities include full SDLC tasks such as analysis, coding, deployments to QA environments, contractor training, and maintaining code quality standards.

- Designed, developed, and maintained software upgrades, new features, bug fixes, and enhancements within the Guidewire InsuranceNow platform, improving stability and functionality for insurance workflows.
- Deployed application changes to QA environments, ensuring smooth integration and readiness for testing cycles which saw a 20% decrease in QA testing errors.
- Created code analysis reports to identify performance bottlenecks, optimize existing modules, and ensure compliance with system standards.
- Mentored and trained new contractors on development best practices, system architecture, and coding standards, accelerating onboarding and improving team efficiency by 50%.
- Helped develop and maintain two in-house services used by MMIC: IVANS Book Roll Transfers and new custom printing scripts for HC3 Transfers.
- Implemented new product lines Personal Liability, new Homeowners and new Auto lines.
- Collaborated with cross-functional teams to troubleshoot issues, resolve production defects, and deliver timely enhancements to meet business requirements.
- Leveraged Java, MySQL, XML, and InsuranceNow APIs to build scalable solutions supporting policy, billing, and claims processes.
- Managed Breeze Projects and assigned developers to Breeze Tickets for production projects
- Wrote standards of procedure (SOPs) for developing process/code review, developer analysis, Hermes printing script process, and IVANS Book Roll transfer process.

DISH NETWORK, ENGLEWOOD, CO

SOFTWARE ENGINEER II, 2021-2025

Responsible for ensuring that different types of software programs communicate with each other on one platform, managing, planning, monitoring, and reporting on key projects from conception through implementation.

Data collection, reporting, and communication to successfully drive project efforts.

- Participated in team meetings, brainstorming sessions, and code reviews, fostering a collaborative and innovative environment for the Outbound Communication Services Email Design Team.

- Developed and tested In-App Messages (IAMs) for SlingTV, contributing to an 11% improvement in user engagement through timely and relevant messaging.
- Quickly implemented and tested all outbound SMS communications for Boost Mobile in customer transactional and marketing, improving user engagement by 56%.
- Enhanced email triggers and automation across DISH enterprise, improving efficiency and engagement.
- Utilized Responsys and Knak to architect, craft, and disseminate marketing and transactional emails, catering to DISH's diverse customer base.
- Scripted new and analyzed existing test scenarios to ensure accuracy, relevance, and necessity.
- Met with internal customers of assigned projects to provide status updates/reports and gather project-related feedback.
- Led development of microservices and APIs using Java and Spring Boot, optimizing backend architecture and enhancing system scalability.
- Communicated between business units to bridge the gap in achieving project vision and requirements.
- Developed, modified, enhanced, and implemented test plans designed to support new or existing business initiatives.
- Designed and implemented a comprehensive onboarding process to accelerate new hire integration, including provisioning access to essential tools, applications, and software, as well as providing hands-on training and support.

ENTRY JAVA DEVELOPER

Daily roles vary widely, including managing the reliability of individual applications or working on several at once. Analyze and identify possible improvements for all functional areas supporting internal applications.

- Specialized in creating automated email solutions using Java in conjunction with Responsys and Knak platforms, ensuring the seamless delivery of customer messages and achieving a 21% reduction in email processing errors.
- Engaged in code reviews and quality assurance processes, ensuring the reliability and performance of Java-based email solutions for a flawless end-user experience.
- Developed RESTful APIs and backend modules using Spring Boot, improving service interaction and reducing deployment errors.
- Maintained documentation and knowledge-sharing practices within the team, promoting best practices and facilitating a culture of continuous improvement in Java development for email communication.
- Improved codebase clarity and developer efficiency through consistent and detailed technical documentation.
- Tested in UAT environments for all created service solutions to ensure processes worked as intended for the end user.
- Pushed live production changes to resolve same-day service errors or logic/design failures.
- Identified and resolved system bottlenecks and workflow inefficiencies by collaborating with cross-functional teams, resulting in improved delivery times and increased system reliability.

CHARTER COMMUNICATIONS, TOWN AND COUNTRY, MO

DATA ANALYST INTERN, 2019

Oversee Training collaboration with Curriculum Team and Field Ops Leadership.

- Developed proficiency in Tableau and Postgres while supporting the business data analyst team.
- Created data presentations and assisted in building databases to enhance data management.
- Delivered presentations to Spectrum VPs, offering insights to optimize analyst workloads.

CORE COMPETENCIES

- Front End Development: HTML, Tailwind CSS, JavaScript, React.js
- Programming Languages: Java, Python, C++, C, Rust
- Databases: Oracle, PostgreSQL, MySQL, AWS
- Frameworks: Spring Boot
- Test Tools: TestRail, SoapUI, Postman, LambdaTest

EDUCATION

COLORADO TECHNICAL UNIVERSITY, Denver, CO
Master of Science, Computer Science, 2022-2023

SAINT LOUIS UNIVERSITY, St. Louis, MO
Bachelor of Arts, Major in Computer Science and Criminology, 2017-2021

PORTFOLIO

PERSONAL HEARDLE - JAVASCRIPT/NODE

Heardle is a daily music game that plays the intro to a song, and the player must guess the song within 16 seconds. This Heardle game was built using JavaScript and is hosted by glitch.com.

DISCORD BOT - JAVASCRIPT

Step-by-step guide to building a custom Discord bot for welcoming new guild members, custom greeting from the bot, adding roles to guild members, starting report tickets for moderators, and adding more features and capabilities. Additionally, gives advice for freely deploying a new Discord bot and maintenance.

RPS GAME - JAVA

A game written in Java. You play a variation of the Rock, Paper, Scissors game against a randomizer. But instead of the standard rock/paper/scissors, you play bowman/spearman/swordman, and a fight scene will appear.

AUTH API PROJECT - RUST

The live-bootcamp-project is a personal project developed as part of a RUST bootcamp, demonstrating skills in building and deploying secure web applications. The project features a Rust-based web app with integrated authentication services, showcasing practical knowledge in backend development, security protocols, and containerization.
